Cameroon - Full stack Developer intern (H/F)

We are:

RODEC CONSEILS is an international Consulting Firm, operating in France, Cameroon and Benin. We work together with firms willing to develop their businesses in these 3 countries, providing accounting, tax, organisation, business intelligence and strategy services. No matter what area or challenge you're tackling, we can help. We pinpoint the most relevant insights and identify and apply integrated technologies in new, innovative ways to empower our clients and people. Our mindset is to help you get into business disruption, optimise workflows, maximise impact, and deliver results, faster.

Our Client:

SEO & Marketing experts. Our goal is to deliver the highest quality traffic possible to all our esteemed partners. We combine our in-depth marketing expertise with our extensive data analytics that we have built over the years.

You are :

A competitive spirit, you have love of innovation and achievement, and your desire to be at the forefront of an evolutionary change in our digital workforce. Now is the time to become a part of an exciting company where your ideas, passion and commitment to excellence will have a direct impact on the products that we build, the new products we create and the people that we engage.

Experience:

Currently enrolled in Computer Science, Software Engineering (or related technical discipline such as User Experience)

What you'll be doing :

- Develop and maintain our Back Office mainly developed NodeJS + Angular and hosted on Google Cloud Platform
- Work on all other areas of our ecosystem, like data ingestion framework in Python

What you'll bring to the team:

- Experience with object-oriented design and coding skills
- Basic knowledge of SQL & web technologies: HTML & CSS, JavaScript
- Ability to work in an agile environment (adaptability, collaboration with stakeholders)
- Can-do and positive attitude

What we are offering:

- Private Health Insurance
- High rated workplace and tools (software/hardware) with good accommodations
